# Enhancing Adaptation Action in Turkey

**Volume  
47**

**PROJECT NEWSLETTER**

**February 2025**

## PROJECT ACTIVITIES

The second training session on the use of the Climate Change Adaptation Strategy and Action Plan Monitoring System was held online on 10-11 February. The program included a review of the training manual and an exchange of information focused on uploading documents to E-NASAP and the Climate Portal.

To raise awareness among local stakeholders, we organized the tenth sectoral awareness-raising training in Adana on 18-19 February, focusing on disaster risk reduction, industry, biodiversity, and ecosystem services. The training brought together 40 participants, including representatives from public institutions, the private sector, and universities. Topics covered included sectoral adaptation options and recommendations, good practices, and sectoral risks.

Similarly, on February 25-26, we held the eleventh sectoral awareness-raising training in Bursa, focusing on health, industry, biodiversity and ecosystem services. The training brought together 53 participants from public institutions, the private sector, and universities. Discussions focused on sectoral adaptation options, recommendations, best practices, and sectoral risks.
